Abstract:

KR 2001001409 A

NOVELTY A speed alarm device for a vehicle and a speed alarm method is provided to warn the excess of speed limit of a driver through an alarm sound by comparing the maximum speed limit of a road with the current speed.

DETAILED DESCRIPTION A speed alarm device comprises: a GPS(Global Positioning System) receiving antenna(2) to receive an electric wave sent from a GPS satellite; a CD-room player to indicate map data registered on a CD-room according to the information received from the GPS receiving antenna; a speed sensor(4) to detect the speed; an alarm device to compare the maximum speed limit of a road received from the GPS receiving antenna with the current speed in a navigation ECU and to generate the alarm sound when the speed exceeds the maximum speed limit.
